Supplemental disclosure with respect to cash flows (note 9)

The accompanying notes are an integral part of these consolidated financial statements

1. BASIS OF PRESENTATION

These consolidated financial statements contained herein include the accounts of IC Potash and its wholly-owned subsidiaries ICP and Trigon Exploration Utah Inc. (collectively referred to as the “Company”).

The interim period consolidated financial statements have been prepared in accordance with Canadian Generally Accepted Accounting Principles (“GAAP”). All amounts, unless specifically indicated otherwise, are presented in Canadian dollars. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of audited annual consolidated financial statements except as disclosed below.

Certain information and footnote disclosure normally included in consolidated financial statements prepared in accordance with GAAP has been condensed or omitted. These interim period financial statements should be read together with the audited consolidated financial statements and the accompanying notes included in the Company’s latest annual report. In the opinion of management, the Company’s unaudited interim consolidated financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

Certain reclassifications have been made to the prior period financial statements to conform to the current period presentation.

2. NATURE OF OPERATIONS AND GOING CONCERN

IC Potash Corp. (“IC Potash”), formerly Trigon Uranium Corp., was incorporated under the Canada Business Corporations Act on November 8, 2002. IC Potash’s primary business is the acquisition and exploration of mineral properties and it is considered to be in the exploration stage. To date IC Potash has not earned operating revenue.

On November 30, 2009, IC Potash acquired 100% percent of the outstanding common shares of Intercontinental Potash Corp. (“ICP”), a company involved in exploration for potash and potash-related minerals. The acquisition constituted a Reverse Take-over (“RTO”) and, although IC Potash is the legal parent of ICP, ICP was deemed to have acquired IC Potash for accounting purposes. Accordingly, the consolidated statements of operations and deficit and cash flows for the period ended March 31, 2009 are those of ICP.

IC Potash has not yet determined whether its mineral properties contain economically recoverable ore reserves. The recovery of the amounts comprising mineral properties and deferred exploration costs are dependent upon the confirmation of economically recoverable reserves, the ability of IC Potash to obtain necessary financing to successfully complete the exploration and development of those reserves and upon future profitable production or, alternatively, upon IC Potash’s ability to dispose of its interest on an advantageous basis.

These consolidated financial statements have been prepared on a going concern basis which assumes that IC Potash will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of IC Potash are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. IC Potash has incurred ongoing losses and there is uncertainty about its ability to continue as a going concern. These consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded assets and classification of liabilities that might be necessary should IC Potash be unable to continue in existence.

Unaudited

3. RECENT ACCOUNTING PRONOUNCEMENTS

(i) International Financial Reporting Standards (“IFRS”)

The Canadian Accounting Standards Board (“AcSB”) announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada’s own GAAP. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of January 1, 2011 will require the restatement for comparative purposes of amounts reported by the Company for the year ended December 31, 2010. A changeover plan is being established to convert to the new standards within the allotted timeline. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

(ii) Business Combinations

In January 2009, the CICA issued Handbook Sections 1582 – *Business Combinations*, 1601 – *Consolidated Financial Statements*, and 1602 – *Non-Controlling Interests*, which replace Sections 1581 “Business Combinations” and 1600 “Consolidated Financial Statements” effective January 1, 2011 with earlier adoption permitted. Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combination accounting standard under IFRS. Section 1582 requires net assets, non-controlling interests and goodwill acquired in a business combination to be recorded at fair value and non-controlling interests to be reported as a component of equity. Acquisition costs are not part of the consideration and are to be expensed when incurred. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. These Sections are applicable for the Company’s interim and annual consolidated financial statements for the fiscal year beginning on or after January 1, 2011. Early adoption of these Sections is permitted and all three Sections must be adopted concurrently. The Company is evaluating the future impact on its financial statements.

5. MINERAL PROPERTIES (cont'd...)

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyance history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and to the best of its knowledge, title to the properties are in good standing.

a) Ochoa property

During the year 2008, the Company acquired certain permits located in Lea County, New Mexico. The permits are valid for two years with the next annual rent due on December 1, 2010. The permits are renewable every two years if the Company meets performance criteria. The Company also paid US\$50,000 into a Permit Bond that may be refundable if certain prospecting permit and reclamation requirements are satisfied, thus this amount is recorded in deposits on the balance sheet. The Ochoa Property is subject to a royalty of US\$1.00 per ton of polyhalite mined for the first 1,000,000 tons and US\$0.50 per ton thereafter. A 5% gross royalty is expected to be imposed by the federal government. The Company signed a royalty agreement on September 28, 2009 for an additional 3% net profits royalty (the "Profit Royalty") for a term of 25 years commencing from the initiation of production of which 1% of the NSR is payable to a director of the Company. The Company may acquire, at its option, up to one-half of the Profit Royalties at a price of \$3,000,000 per 0.5%.

As part of the acquisition of the Ochoa permits, the Company issued 500,000 common shares valued at \$30,000 during fiscal 2009.

b) Other properties

In March 2010, the Company wrote off all other mineral properties (including Dove Creek, Sinbad, Pine Ridge, and Other) because the Company does not intend to advance these properties in the foreseeable future.

6. CAPITAL STOCK AND CONTRIBUTED SURPLUS

	Number of Shares	Capital Stock	Contributed Surplus
Authorized			
Unlimited common shares			
Common shares issued			
Balance as at December 31, 2009 and March 31, 2010	59,397,490	\$ 12,305,072	\$ 683,838

Escrow

Included in the shares outstanding at March 31, 2010, are 4,684,685 (March 31, 2009 – nil) common shares held in escrow. These escrowed shares may not be transferred, assigned or otherwise dealt with without the consent of the regulatory authorities.

7. STOCK OPTIONS AND WARRANTS

Stock options

The Company has an incentive stock option plan (the “Plan”) whereby the Company may grant stock options to eligible employees, officers, directors and consultants at an exercise price to be determined by the board of directors, provided the exercise price is not lower than the market value at time of issue. The Plan provides for the issuance of up to 10% of the Company’s issued common shares as at the date of grant with each stock option having a maximum term of five years. The board of directors has the exclusive power over the granting of options and their vesting provisions.

As at March 31, 2010, the Company had stock options outstanding, enabling the holders to acquire the following number of common shares:

Number of Options	Exercise Price	Expiry Date
125,000	1.34	November 6, 2011
62,500	4.20	January 9, 2012
150,000	1.16	August 28, 2013
<u>3,750,000</u>	0.40	June 14, 2014
<u>4,087,500</u>		

Stock option transactions are summarized as follows:

	Number of Options	Weighted Average Exercise Price
Outstanding at December 31, 2009	4,175,000	0.55
Cancelled/expired	(87,500)	2.20
<u>Outstanding at March 31, 2010</u>	<u>4,087,500</u>	<u>\$ 0.51</u>
<u>Number of options exercisable at March 31, 2010</u>	<u>4,087,500</u>	<u>\$ 0.51</u>

7. STOCK OPTIONS AND WARRANTS (cont'd...)

Stock-based compensation

There was no stock-based compensation during the first three months of 2010.

Warrants

As at March 31, 2010, the Company had warrants outstanding, enabling the holders to acquire the following number of common shares:

Number of Warrants	Exercise Price	Expiry Date
8,852,200	\$ 0.65	December 2, 2011
<u>68,750</u>	\$ 0.65	December 3, 2011
8,920,950		

Warrant transactions are summarized as follows:

	Number of Warrants	Weighted Average Exercise Price
Outstanding at December 31, 2009 and March 31, 2010	8,920,950	\$ 0.65

Agents' unit options

As at March 31, 2010, the Company had agents' unit options outstanding, enabling the holders to acquire the following number of units:

Number of Unit Options	Exercise Price	Expiry Date
<u>398,300</u>	\$ 0.40	December 2, 2010
398,300		

Agents' unit option transactions are summarized as follows:

	Number of Unit Options	Weighted Average Exercise Price
Outstanding at December 31, 2009 and March 31, 2010	398,300	\$ 0.40

8. RELATED PARTY TRANSACTIONS

During the period ended March 31, 2010, the Company entered into the following transactions with related parties:

- a) Paid or accrued directors' fees, included in administrative costs, of \$26,500 (2009 - \$3,750) to directors of the Company.
- b) Paid or accrued consulting fees of \$38,500 (2009 - \$3,000) to directors of the Company.

Included in accounts payable as at March 31, 2010 is \$66,202 (December 31, 2009 – \$6,000) due to directors and corporations controlled by directors.

These transactions were in the normal course of operations and were measured at the exchange value which represented the amount of consideration established and agreed to by the related parties.

9. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

Supplemental disclosure with respect to cash flows	Three Months ending March 31, 2010	Three Months ending March 31, 2009

11. SEGMENTED INFORMATION

The Company has one reportable business segment being the acquisition and exploration of mineral properties. Geographical information is as follows:

	March 31, 2010			December 31, 2009		
	Canada	USA	Total	Canada	USA	Total
Equipment	\$ 69,032	\$ 70,923	\$ 139,955	\$ 75,028	\$ 74,658	\$ 149,686
Mineral Properties	-	3,297,953	3,297,953	-	3,175,862	3,175,862
	\$ 69,032	\$ 3,368,876	\$ 3,437,908	\$ 75,028	\$ 3,250,520	\$ 3,325,548

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments

The Company has designated its cash and deposits as held-for-trading, measured at fair value using level one as the basis for measurement in the fair value hierarchy. Receivables are classified as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost. The carrying value of receivables and accounts payable and accrued liabilities approximate fair value because of the short-term nature of these instruments.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's credit risk is primarily attributable to cash and receivables. The Company has no significant concentration of credit risk arising from operations. Cash consists of chequing and savings accounts at reputable financial institutions, from which management believes the risk of loss to be remote. Federal deposit insurance covers balances up to \$100,000 in Canada and up to \$100,000 in the United States. Financial instruments included in receivables consist of amounts due from government agencies, and receivables from related and unrelated companies. The Company limits its exposure to credit loss for cash by placing its cash with high quality financial institutions and for receivables by standard credit checks. The Company's credit risk has not changed significantly from the prior period.

Liquidity risk

The Company's ability to remain liquid over the long term depends on its ability to obtain additional financing. The Company has in place planning and budgeting processes to help determine the funds required to support normal operating requirements on an ongoing basis as well as its planned development and capital expenditures. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at March 31, 2010, the Company had a cash balance of \$5,188,401 to settle current liabilities of \$539,281.

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Interest rate risk

The Company has cash balances subject to fluctuations in the prime rate. The Company's current policy is to invest excess cash in investment-grade deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. Management believes that interest rate risk is remote as investments have maturities of three months or less and the Company currently does not carry interest bearing debt at floating rates.

Foreign currency risk

The Company's functional currency is the Canadian dollar, however most major transactions are in US dollars. Thus, the Company has converted the majority of its cash to US currency. The Company is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility in these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk. A 1% change in the foreign exchange rate would have had a \$65,000 impact on foreign exchange gain or loss.

Price risk

The Company is exposed to price risk with respect to commodity prices, specifically potash and other fertilizer products. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company. The Company's future mining operations will be significantly affected by changes in the market prices for potash. Commodity prices fluctuate on a daily basis and are affected by numerous factors beyond the Company's control. The supply and demand for commodities, the level of interest rates, the rate of inflation, investment decisions by large holders of commodities, and stability of exchange rates can all cause significant fluctuations in commodity prices.

13. CAPITAL MANAGEMENT

The Company's objectives when managing capital are:

- (a) To safeguard its ability to continue as a going concern;
- (b) Continue the exploration of its mineral properties; and
- (c) Maintain a capital structure which optimizes the cost of capital at acceptable risk.

The Company manages and adjusts its capital structure based on available funds in order to support its operations and the acquisition, exploration and development of mineral properties. The capital of the Company consists of share capital and options. The Company had no bank indebtedness at period-end. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company must rely on capital markets to support continued growth. There can be no assurance that the Company will be able to obtain sufficient capital in the case of operating cash deficits. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. The Company is not subject to externally imposed capital requirements. The Company does not pay dividends.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no changes in the Company's approach to capital management during the period ended March 31, 2010.
